

Exploration Carats

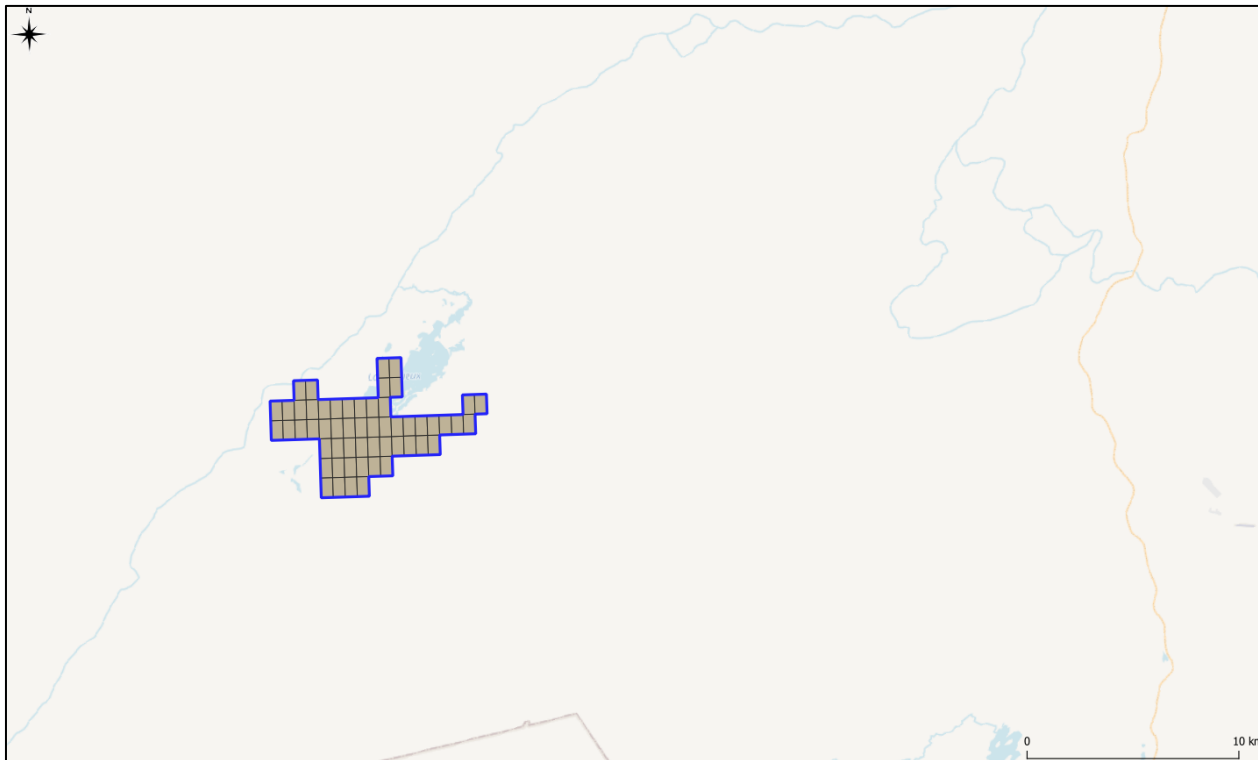

33A07 Project

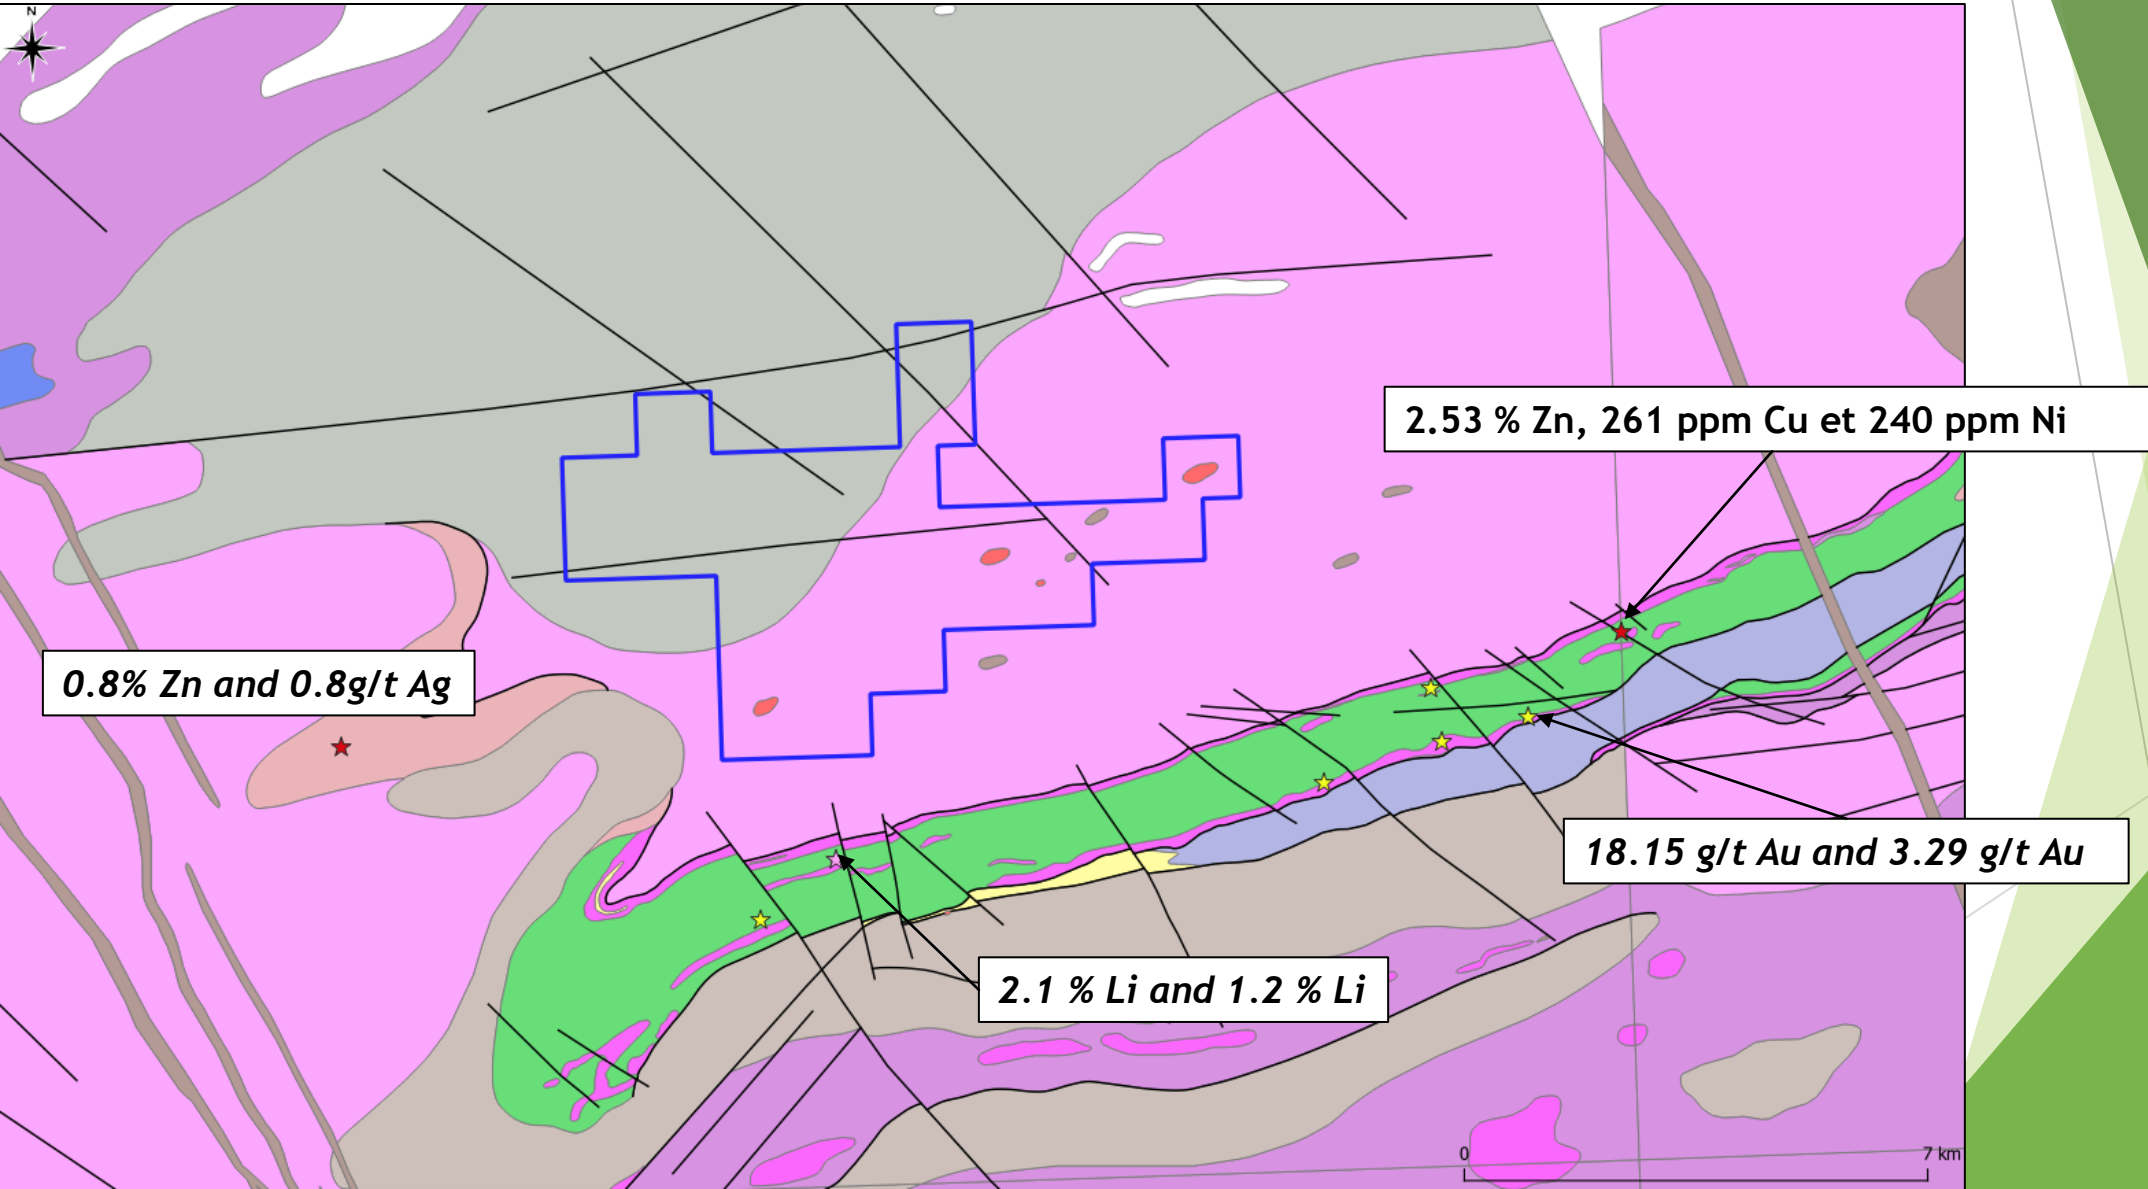

Key Facts

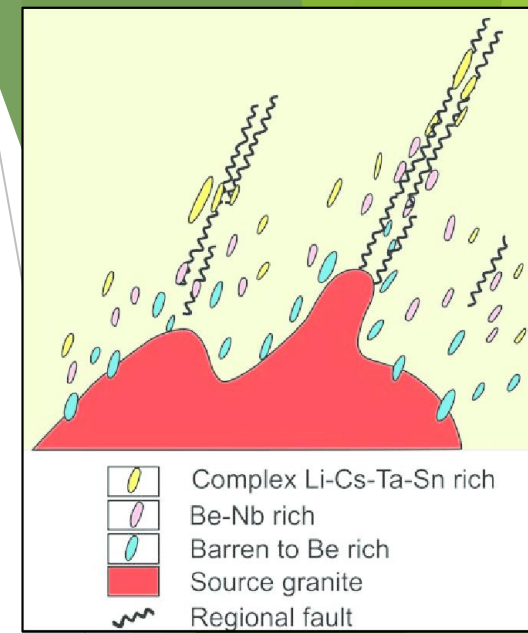

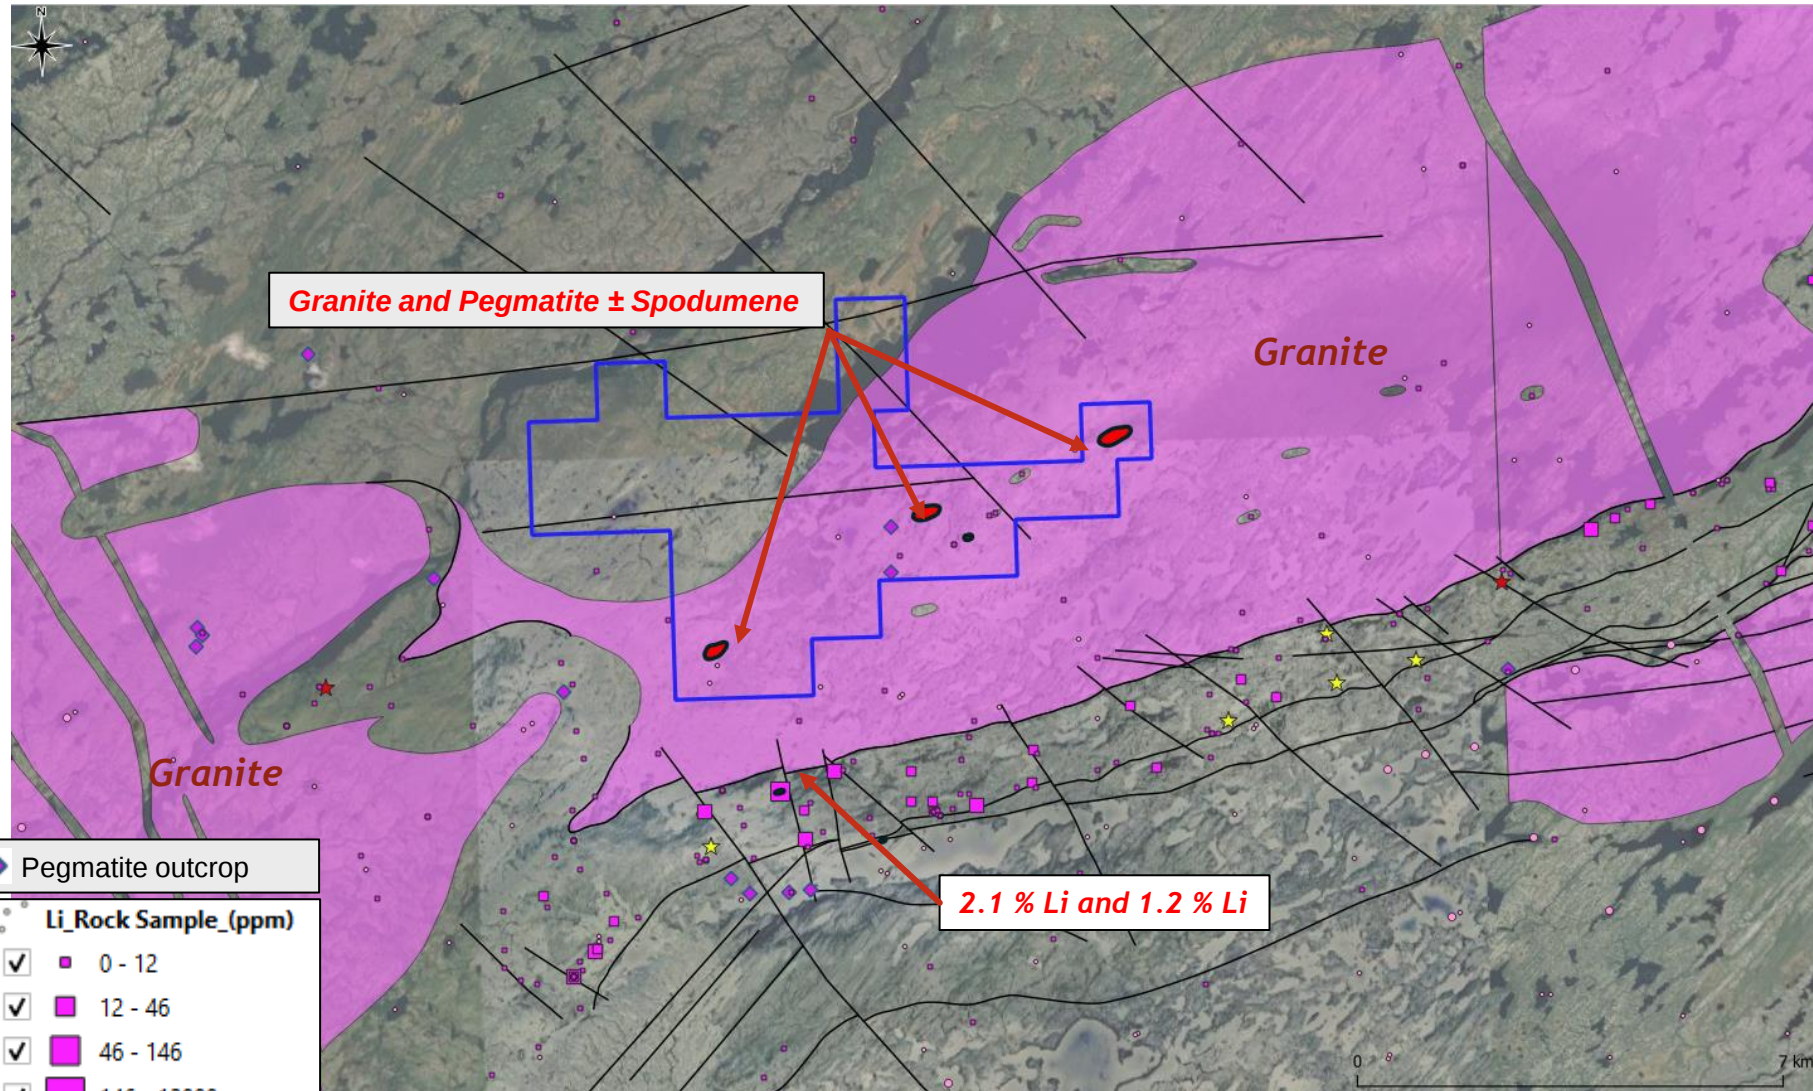

- ▶ 44 mining titles for 2000 Ha in James bay area. + 9 New claims attributed
- ▶ Proximity to main road access
- ▶ Prospective Lithium District

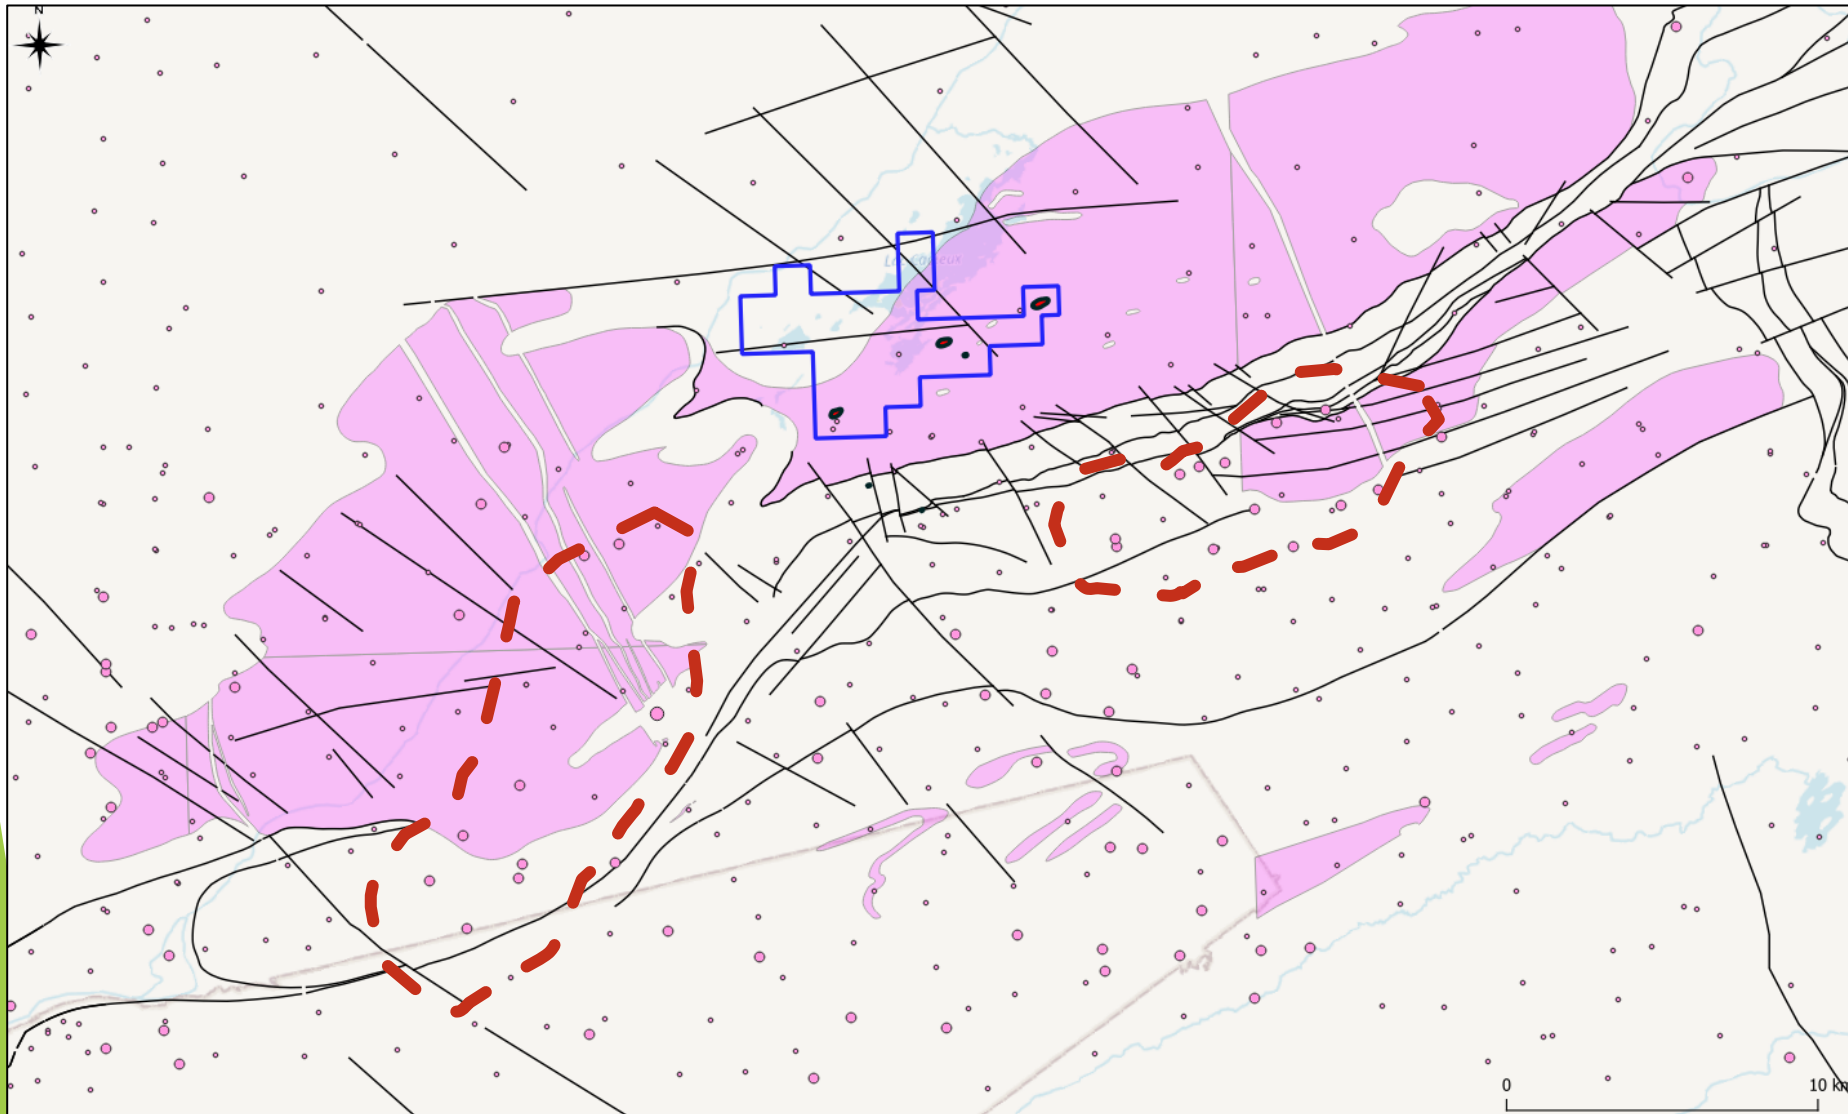

➤ Favorable geological context for multiple commodities

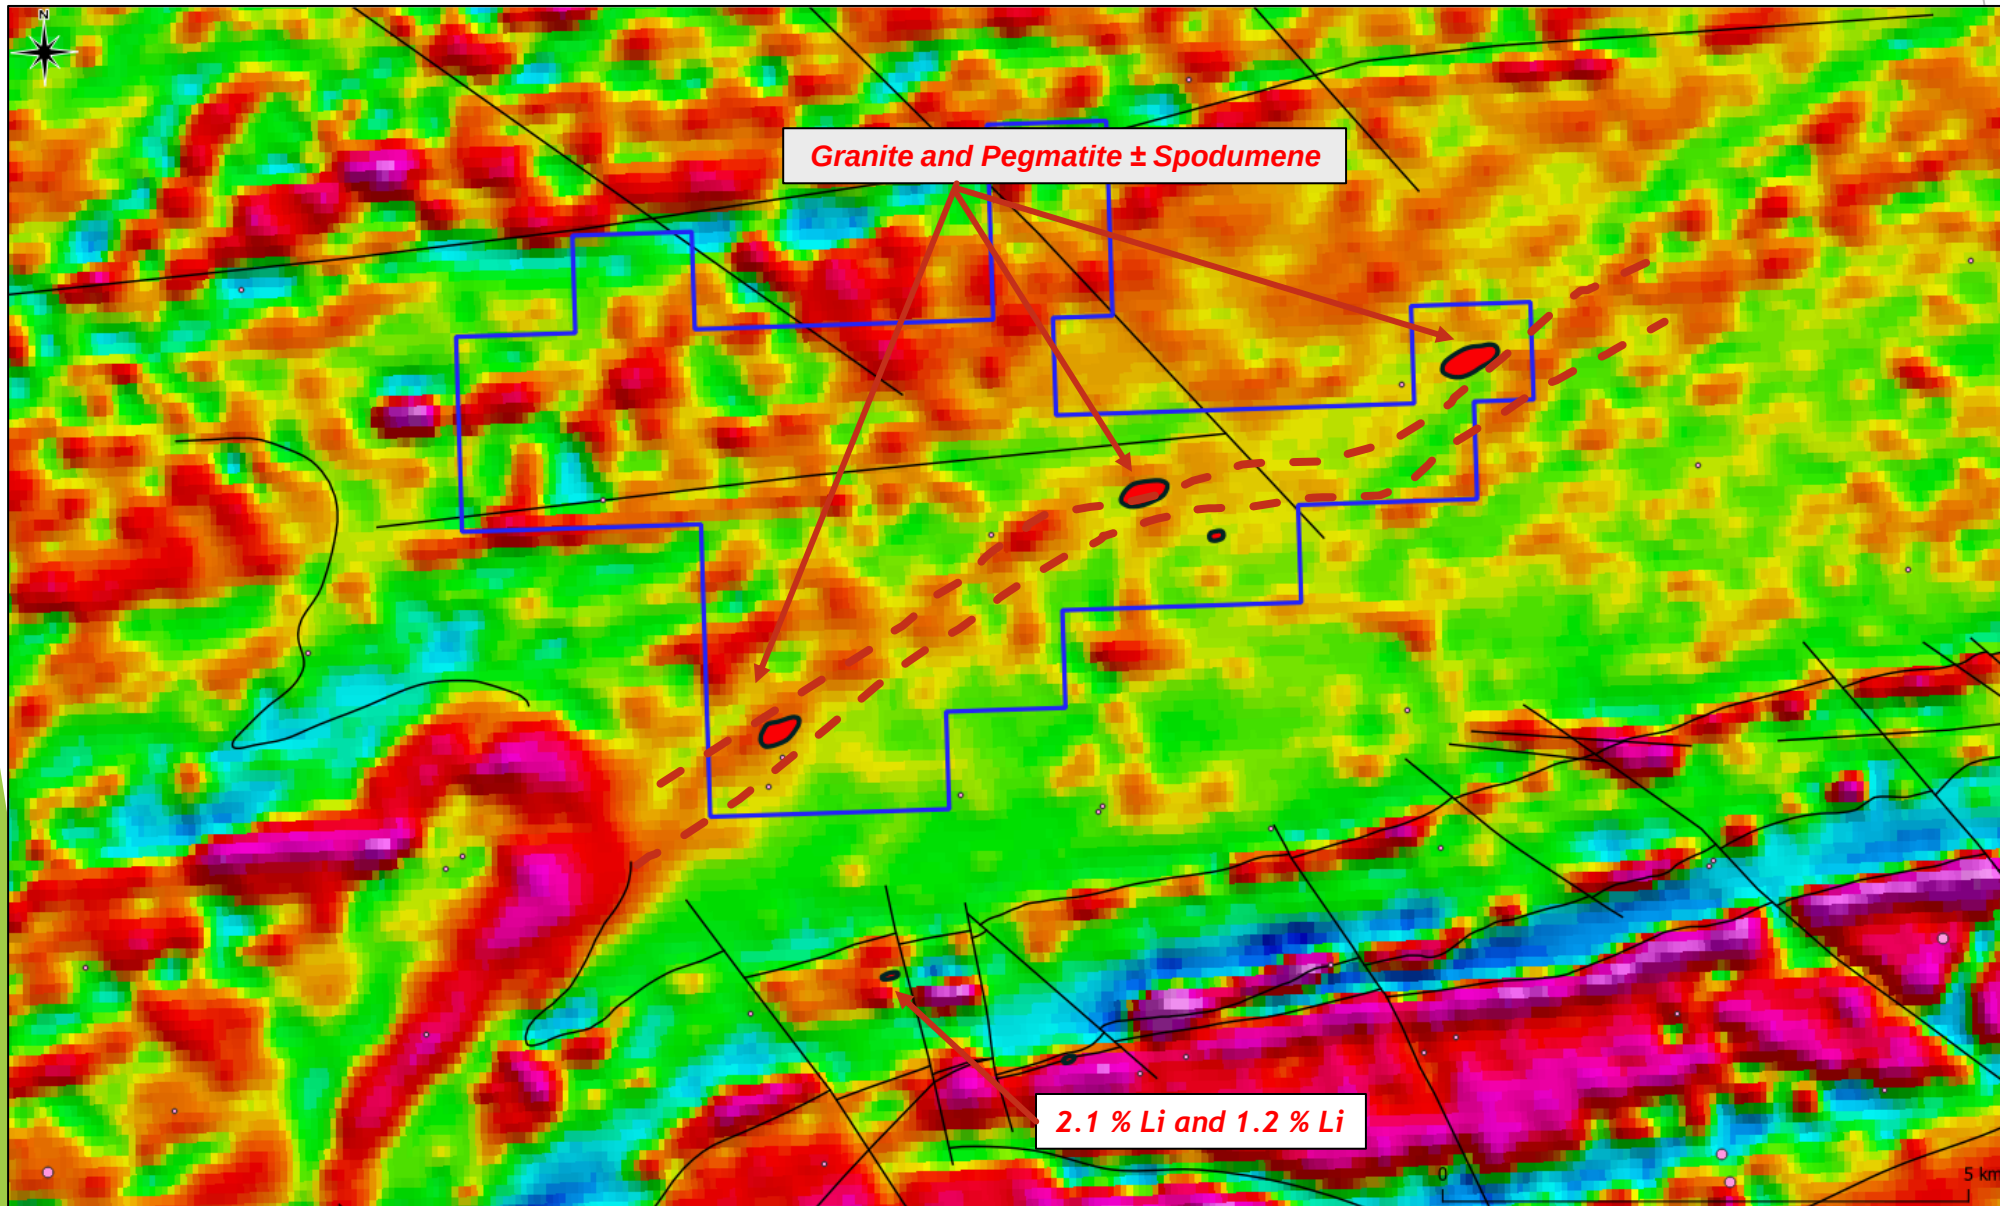

➤ Good geological context for Lithium

➤ *Good geological context for Lithium - Down ice Li anomalies in Soils.*

➤ Potential 9 km Spodumene - pegmatite trend

➤ *Mineral potential summary*

- ▶ *Good regional geological indicators for Lithium mineralization.*
- ▶ *Lithium occurrences on surrounding showing Pegmatite Hill.*
- ▶ *Significant prospective trend relatively recently discovered (2018).*
- ▶ *Underexplored for Pegmatite and Lithium.*
